DETAILED ACTION

Claim Rejections - 35 USC § 103

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 58-69 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gwathmey et al (US Patent 4,809,695) in view of Fujitsuka et al (US Patent 4,899,744). The patent to Fujitsuka et al discloses a method for performing anastomosis by providing a plurality of superelastic fasteners 3. The reference teaches approximating target vessels but lack teachings of utilizing graft vessels with target vessels. Gwathmey et al teach the method steps recited in the claims above however, it fails to teach the use of superelastic clips. It is well known in the art to substitute graft vessels with target vessels. It would have been obvious to one having ordinary skill in the art to substitute the target vessel of Fujitsuka et al with one of the target vessels of Gwathmey et al. In the alternative it would have been obvious to one having ordinary skill in the art to substitute one of the clips of Gwathmey et al with the superelastic clips of Fujitsuka et al.

Allowable Subject Matter

Claims 70-72 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
